

SREEDEEP GHOSH

Software Developer, AI-ML,LLM

Howrah, West Bengal, 711303 | +91 9007796421 | sreedeepghosh2005yt@gmail.com

PROFESSIONAL SUMMARY

Full-stack software developer and AI/ML enthusiast with hands-on experience building web applications, interactive dashboards, and AI/LLM-integrated features. Skilled in frontend and backend API development, data structures and algorithms, and deploying end-to-end products. Proven ability to design, build, and ship real-world platforms independently and in team settings, with a strong foundation in machine learning, automation, and scalable system design.

TECHNICAL SKILLS

- Programming Languages: Python, Java, C, JavaScript
- Web Development: React.js, Node.js, Express.js, REST API Development, MongoDB, HTML5, CSS5
- AI / LLM & Machine Learning: Machine Learning, Deep Learning, CNN & Neural Network Design, LLM Integration & Prompt Engineering, AI-Assisted Automation
- Data Structures & Algorithms: Arrays, Trees, Graphs, Sorting/Searching, Complexity Analysis, Problem Solving
- Dashboard & Frontend Engineering: Dashboard Design, Data Visualization, Responsive UI Development
- Tools & Platforms: Git & GitHub, VS Code, Postman, Docker (Familiar)
- Other: Data Analysis & Visualization, Automation Scripting, Workshop Facilitation

EXPERIENCE

Core Team Member — Machine Learning

Google Developer Group On Campus

- Developed ML-driven solutions for community-focused technical challenges.
- Conducted hands-on workshops and peer-learning sessions on AI/ML and software development topics.
- Organized outreach programs and events promoting Google technologies and developer best practices.

PROJECTS

Online Coding Platform — Full-Stack (MERN)

- Designed, built, and deployed a full-stack online coding platform (React, Node.js, Express, MongoDB) featuring an in-browser code editor and an automated online judge/compiler for real-time code execution and evaluation.
- Implemented secure code submission, compilation, and test-case evaluation pipeline supporting multiple programming languages.
- Built RESTful APIs and a user dashboard for tracking submissions, problem progress, and performance analytics.

Deepfake Detection — Deep Learning

- Built a self-trained Convolutional Neural Network (CNN) with a complete image preprocessing and training pipeline.
- Improved real-vs-fake classification accuracy through iterative model optimization and hyperparameter tuning.

Taxonomy — eDNA Species Identification

- Developed a machine learning model for species-level environmental DNA (eDNA) classification.
- Achieved high classification accuracy while ensuring scalable handling of large genomic datasets.

DWLR — Water Level Detection & Trend Prediction

- Built a real-time water-level monitoring system covering multiple regions across India.
- Implemented time-series forecasting models to predict future water-level trends.

EDUCATION

B.Tech in Information Technology

2024 – 2028

MCKV Institute of Technology | Currently in 3rd Year

- 1st Year GPA: 8.34 | 2nd Year GPA: 8.4

Class 12 (Higher Secondary)

2024

St. Mary's Convent School

- Score: 80.75%

Class 10 (Secondary)

2022

St. Mary's Convent School

- Score: 89%
